DETAILED ACTION

Election/Restrictions

Claim 1 generic to a plurality of disclosed patentably distinct species comprising

Group invention A, in which Applicant is required to choose one of the following species:

a1) claims 2-3; that includes claims 1, 4-5, 7/8 and 9-10: wherein said outer layer is of fibrous material

a2) claim 6; that includes claims 1, 4-5, 7/8 and 9-10; wherein said outer layer is of a non-fibrous material with evenly distributed voids

Group II invention B, in which Applicant is required to choose one of the following species:

b1) claim 7, that includes claims 1, 6/2-3, 4-5, and 9-10: wherein said outer layer consists of a tape wound around the surface of the said element with passive metal outer surface

b2) claim 8, that includes claims 1, 6/2-3, 4-5, and 9-10: wherein said outer layer consists of a tape arranged longitudinally along the surface of the said element with passive metal outer surface.

Thus, each of the above species require a different search than that of other inventions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Sofeer on 2/1/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
